

HIQ Hospitality

HIQ hospitality is integrated automation system and foundation for smart Hospitality. It is based on Robotina/Cybrotech industrial grade controllers and provides full flexibility together with reliability and functionality. System integrators can combine ready made solutions like Guest Room Management System (GRMS-IQ) or Lighting automation (Lihtng-IQ) with fully programmable Cybro (<https://cybrotech.com>) to create customized and efficient automation for all spaces and systems.

Among unique features of GRMS-IQ are:

Digital keys (efficiency and guest experience without physical key), integration with 4Spaces and easy integration through API with PMS and other Hotel management solutions, fully automatic reception support, customizable visible elements, EMS compatibility, EV charging integration
