

TGP application creation

Install VisualTFT

VisualTFT download page (Chinese): <https://www.gz-dc.com/category/typeid/8>

VisualTFT installation: [visualtft_3.0.0.1249.rar](#)

- Download,
- Unzip (Unrar)
- Install

Prepare TGP application

- Download and unzip TGP template: [tgp_template.zip](#)
- In VisualTFT open # `tgp_project.tftprj`
- prepare screens and graphical elements
- edit `main.lua` to process communication between TGP and CyBro

Testing TGP

- Connect CR-D1 A and B to USB to COM adapter
- In VisualTFT installation folder find and run `TFTSimulator.exe`

- In VisualTFT installation folder find and run DCIOT .exe

- Run simulator

Transferring application to TGP

- 
- Insert micro SD card into slot at bottom of TGP (SD card contacts versus front of display)

- Reset TGP with pin (pinhole on bottom right side)
