General description

IR-580-IQ is a passive infrared detector with sleek and compact housing. It delivers many advanced features and aesthetical appearance required by security professionals. The IR-580 provides typical wide angle detection for general areas.

Installation instruction

- Do not install the detector at position which faces direct or reflected sunlight or near windows with direct car headlight.
- Ensure that there are no obstructions (plants, screens, furniture etc.) in the field of view that may cause incorrect cover/operation of the detector.
- Avoid locating the detector in areas that contain equipment that may change the environment temperature rapidly (i.e. above radiator or under the air-conditioner)
- Install the detector at proper height on a rigid surface. Do not install the detector on vibrating surface.
- PIR detector is more sensitive to the motions "across" the detection zones than "toward" or "away" the unit.
