

LUD12-IQ

Universal 230VAC light dimmer for LD-P4-IQ

Model number:	LUD12-IQ		
Connects to:	LD-P4-IQ		
Mounting:	DIN rail, 1M, 18 mm		
Dimensions:	18 × 63 × 87 mm		

Applications

• Dimming all 230 VAC dimmable lights

Features

- Automatic load detection
- Electronic overload protection
- Over-temperature shutdown

General description

Activation takes place from the LD-P4-IQ. The output voltage is adjusted from 0-100% depending on the LD-P4-IQ command. The activation terminals X1/X2 in the LUD12 are isolated from the mains voltage by an optocoupler. Automatic load detection, electronic overload protection and over-temperature shutdown are active and independent from activation.

Technical specifications

Supply voltage	230 VAC		
Output power:			
Incandescent lamps 230V (R)	400 W		
Halogen lamps 230V (R)	400 W		
Inductive transformers (L)	400 W		
Capacitive transformers (C)	400 W		
Dimmable energy saving lamps ESL	400 W		
Dimmable 230V LED lamps	400 W		
Parameters for PWM activation:			
Frequency:	100Hz		
Duty cycle:	0 (= OFF) linear up to 90% (= full output voltage)		
Level:	10-24 volts (e.g. PLC output)		
Activation current:	1mA (10V) to 3mA (24V)		
Connection polarity:	X1 = +, X2 = - (GND), polarity reversal protection		
Isolation:	by optocoupler		

Terminals

LD-P4-IQ common	X1	PWM intput	Light output	×	Lamp live
LD-P4-IQ output	X2		Light power supply live	L	Lights power supply
			Light power supply neutral	N	Neutral power supply and lamp
