

1. Rustdesk

The open source alternative to TeamViewer

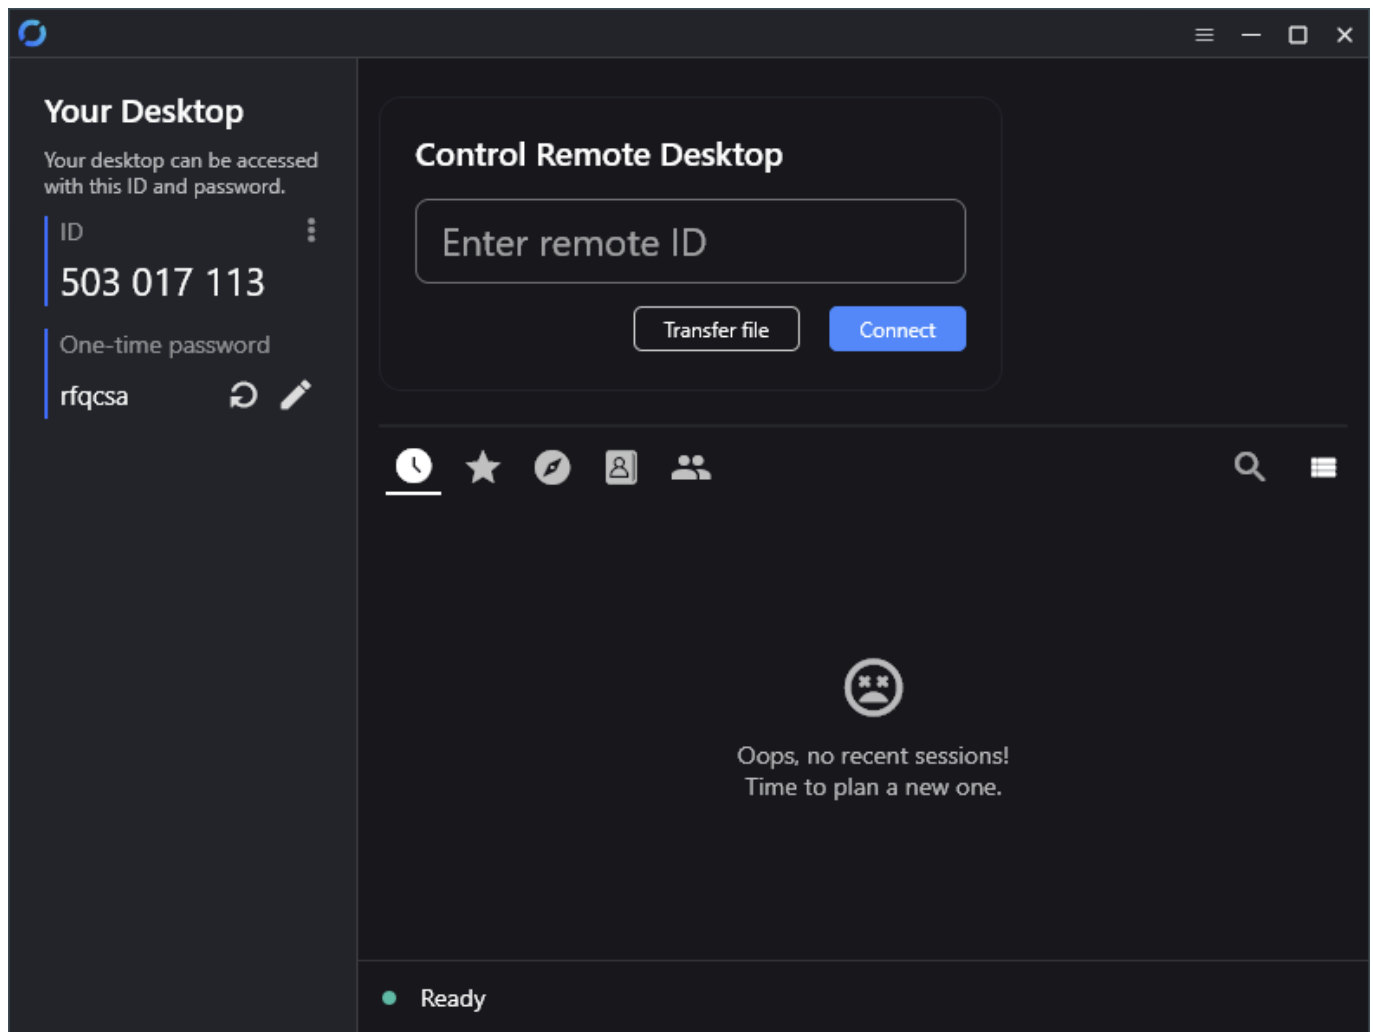

1.1. Client installation

[Official instructions](#)

Download Rustdesk client for your platform from [Rustdesk Github](#) and run it.

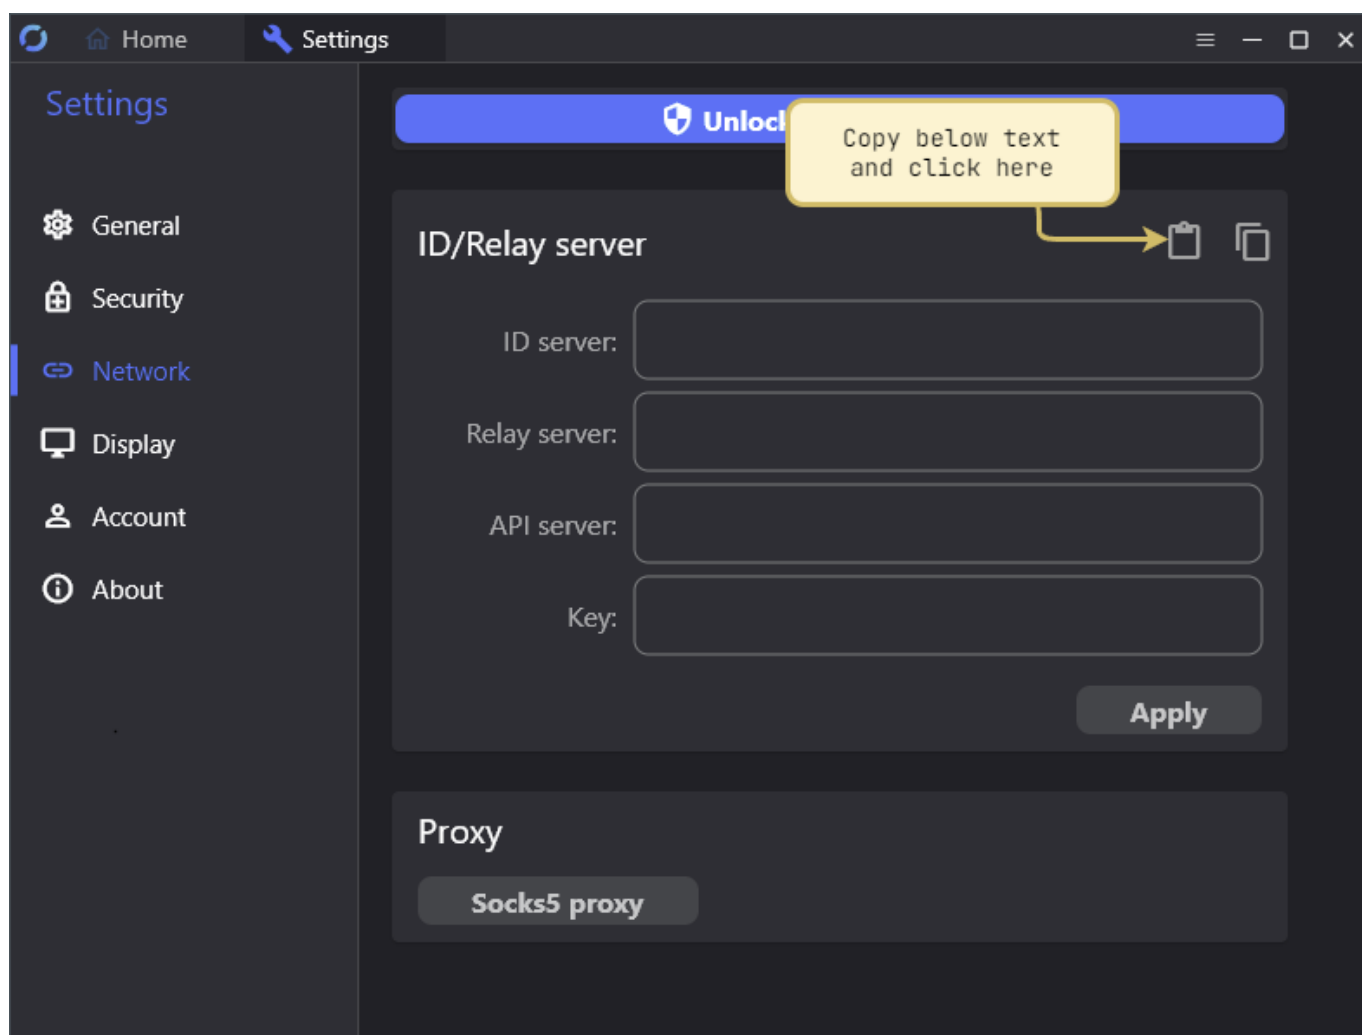

Select “Install” button and follow installation procedure.

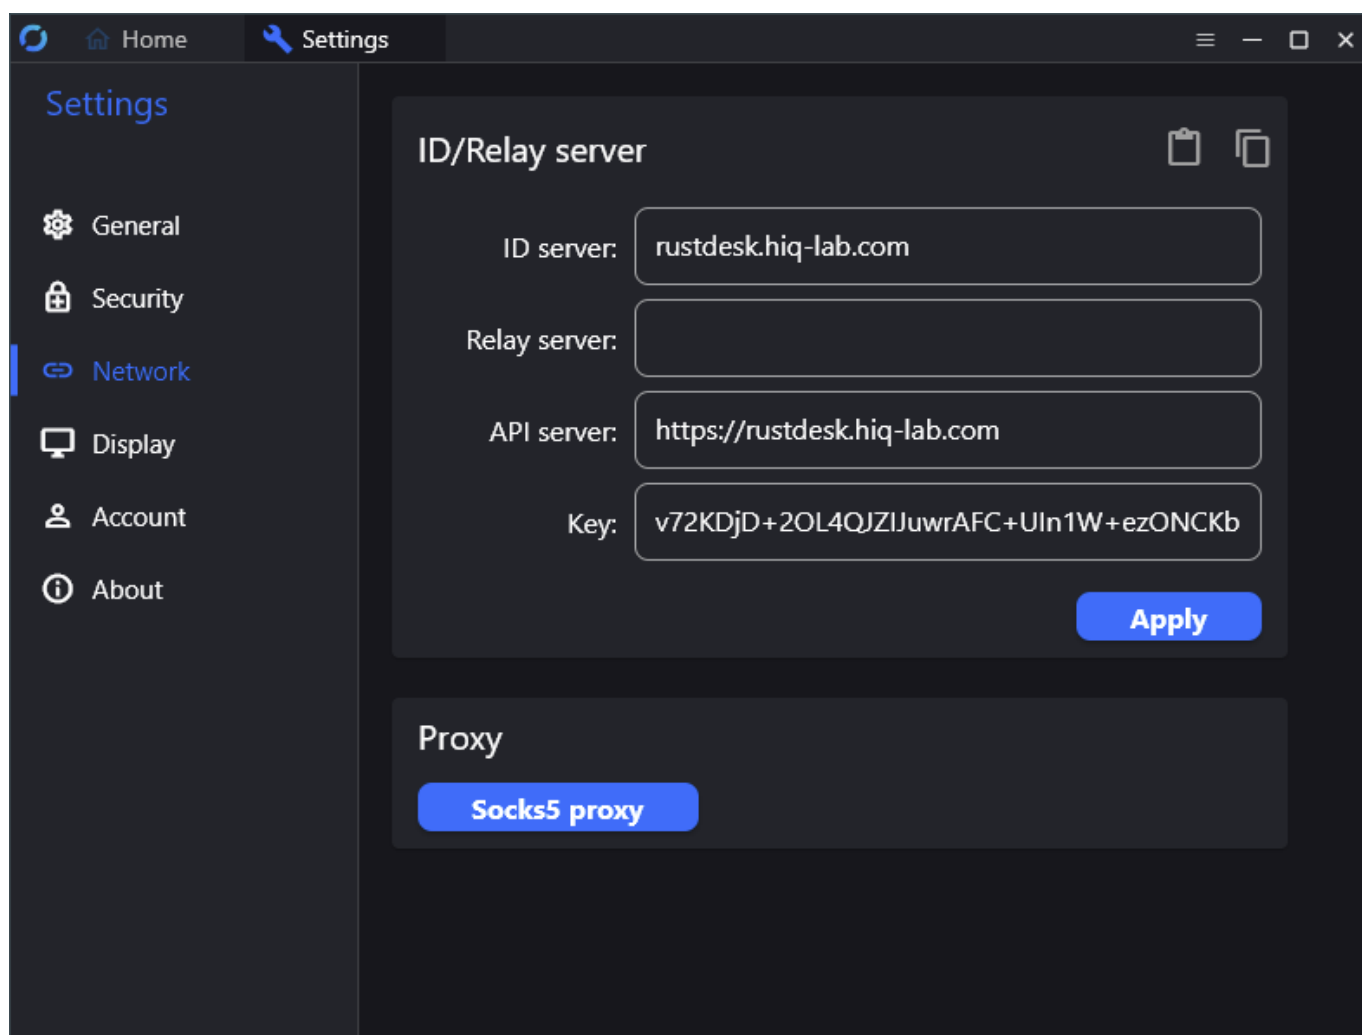

Select any of 2 setup icons (tre dots on left of ID or pencil near one-time password) to enter settings.

Select "Network" page (left side menu) and click "Unlock network settings" on top of the page.

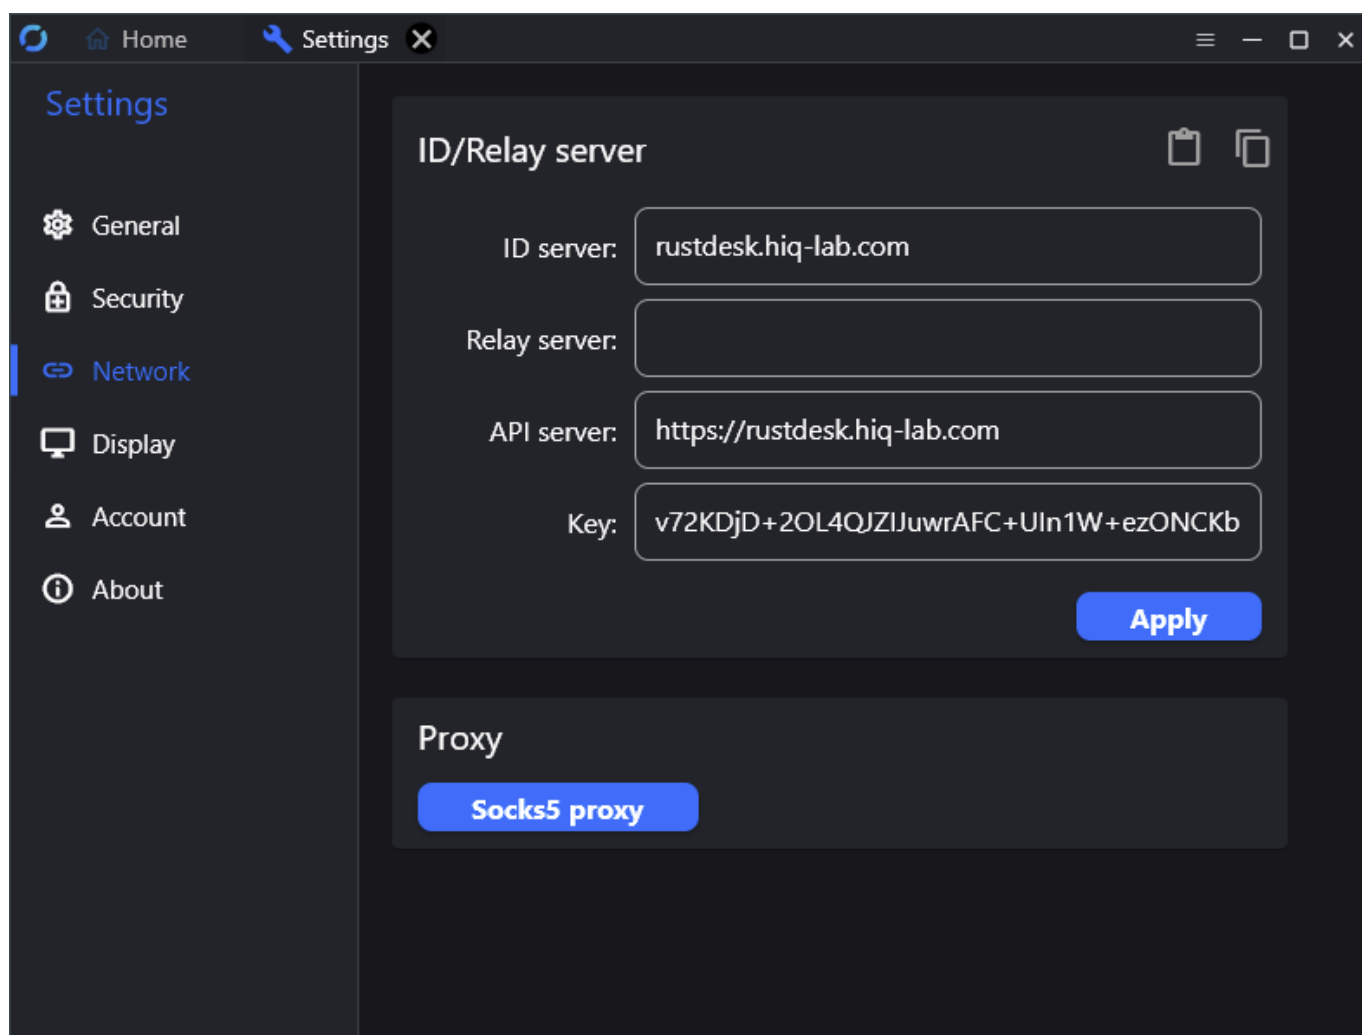

Copy below text (into clipboard) and paste it by click on clipboard icon.

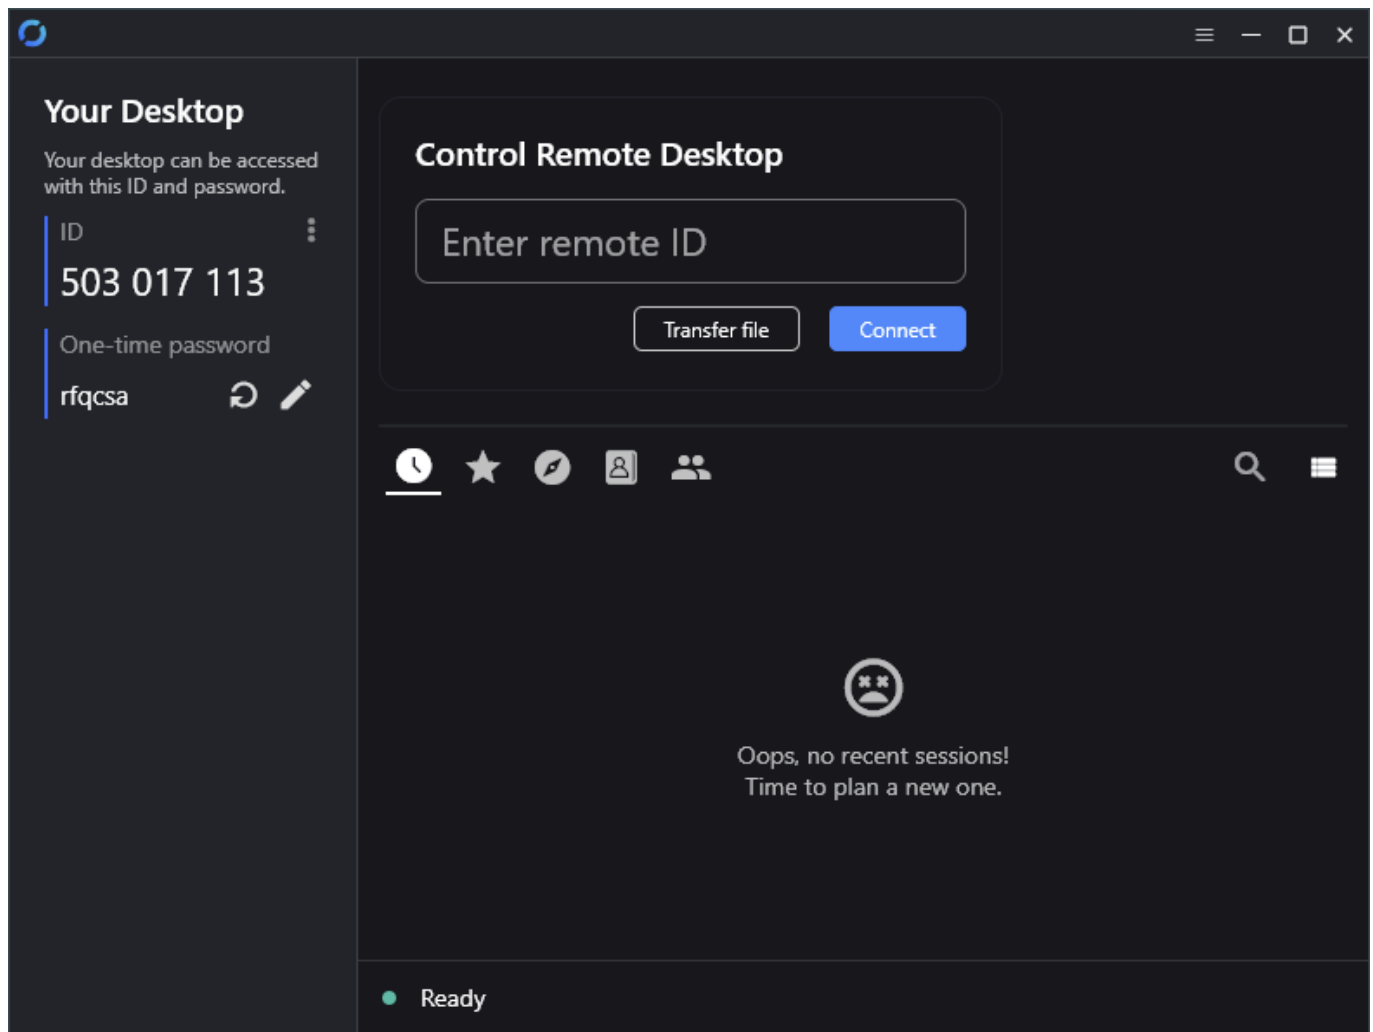

```
9JSP3NESXJXMit0Q09keltyVx4WSVtyQGfkc3VnSJplSRRDTPJzKEpGRLJzN2Ji0ikXZrJCLi02b  
j5iYhxWLxlGaus2clRGdzVncv8i0zBHd0hmI6ISawFmIsIiI6ISehxWZyJCLi02bj5iYhxWLxlGa  
us2clRGdzVnciojI0N3boJye
```

Click “Apply” button and exit “Settings” by clicking x near Settings tab (will appear only when mouse is over).

Check status at bottom of screen (should be Green dot with Ready status).

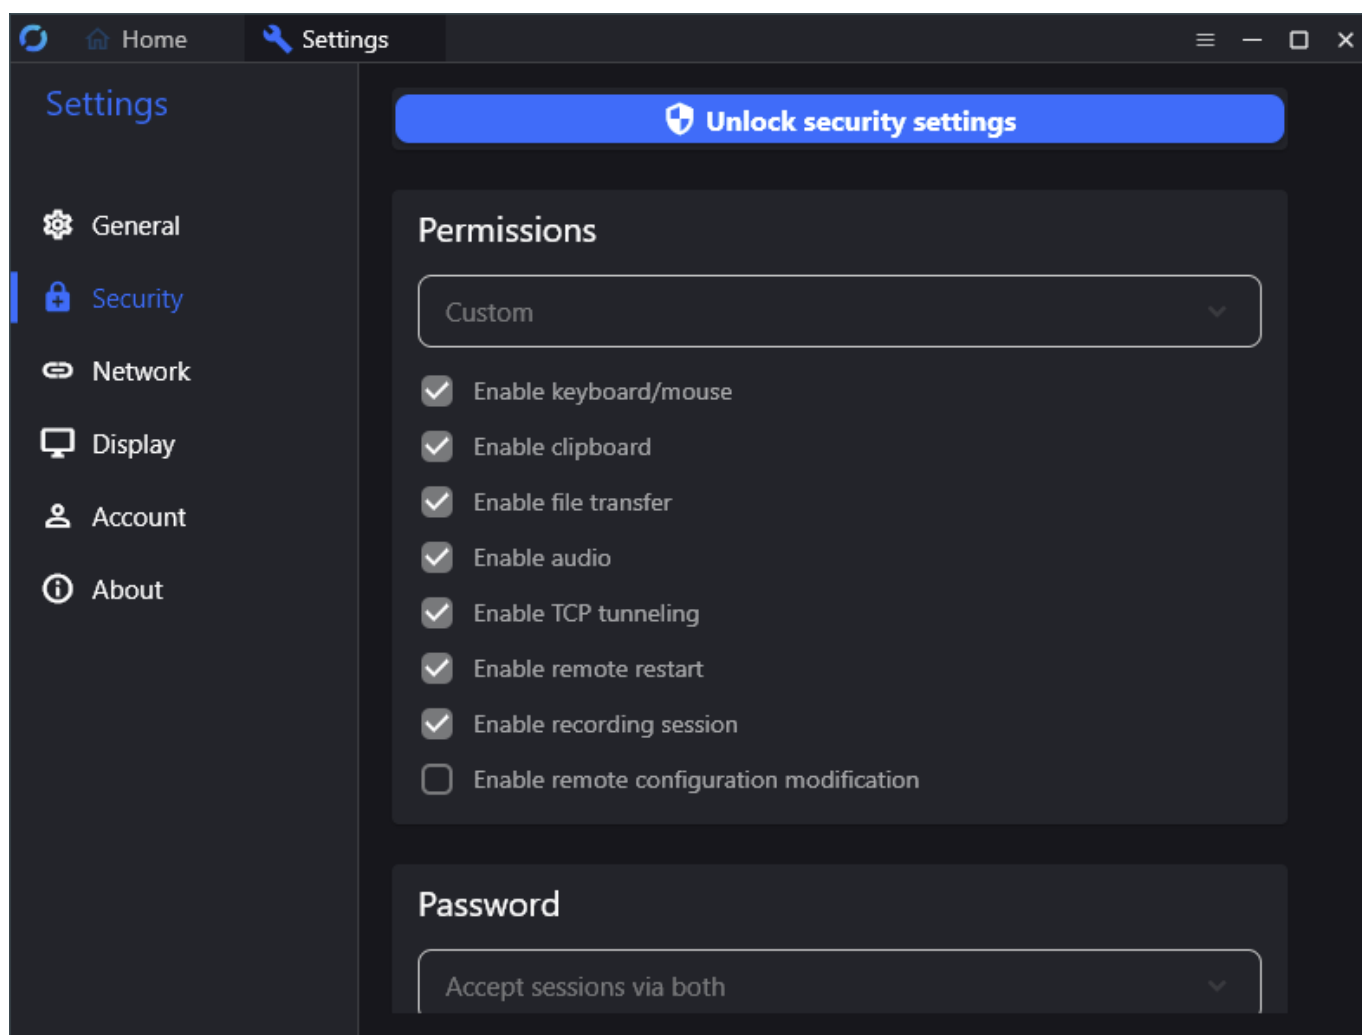

Enable access to your computer by sharing ID and one-time password.

1.2. Set-up permanent password

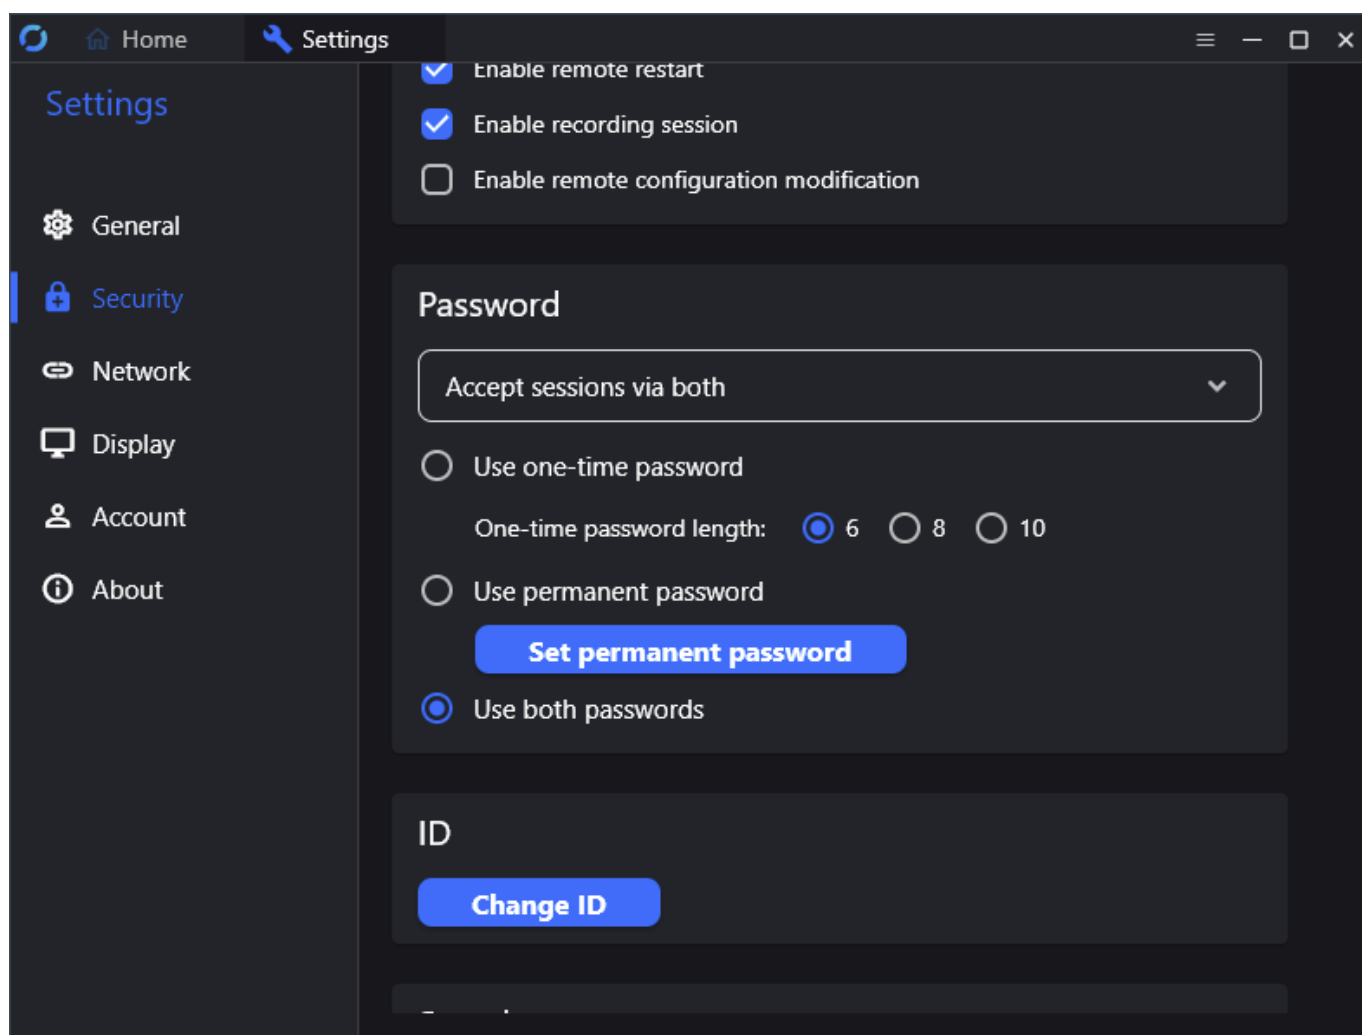

Permanent password is needed for unattended access to your computer (access to home computer from work).

Go-to **Settings - Security**

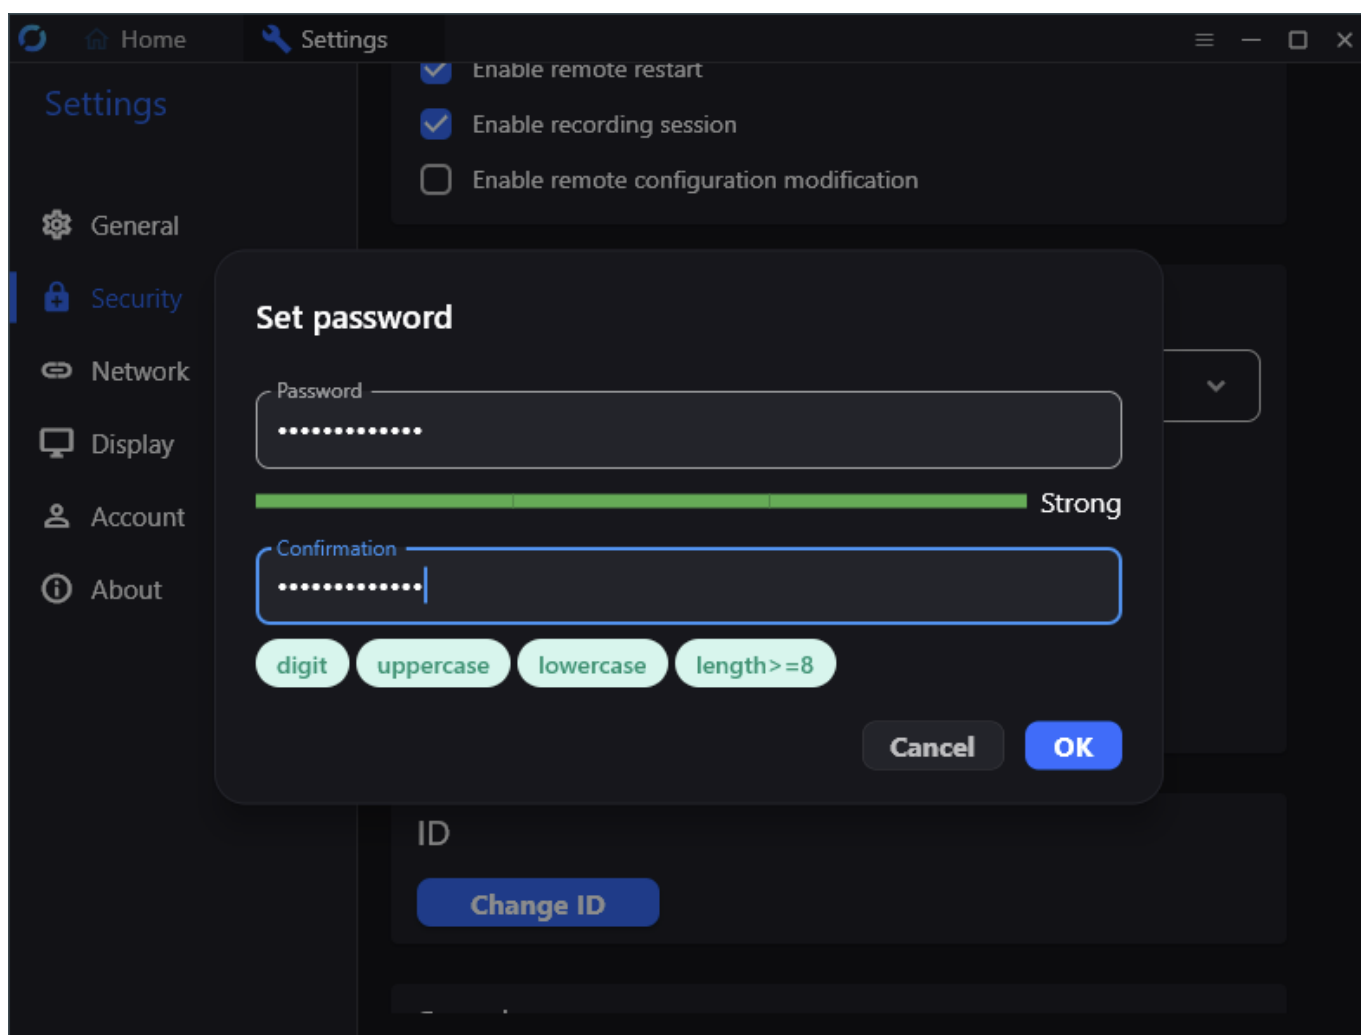

1. Unlock security settings

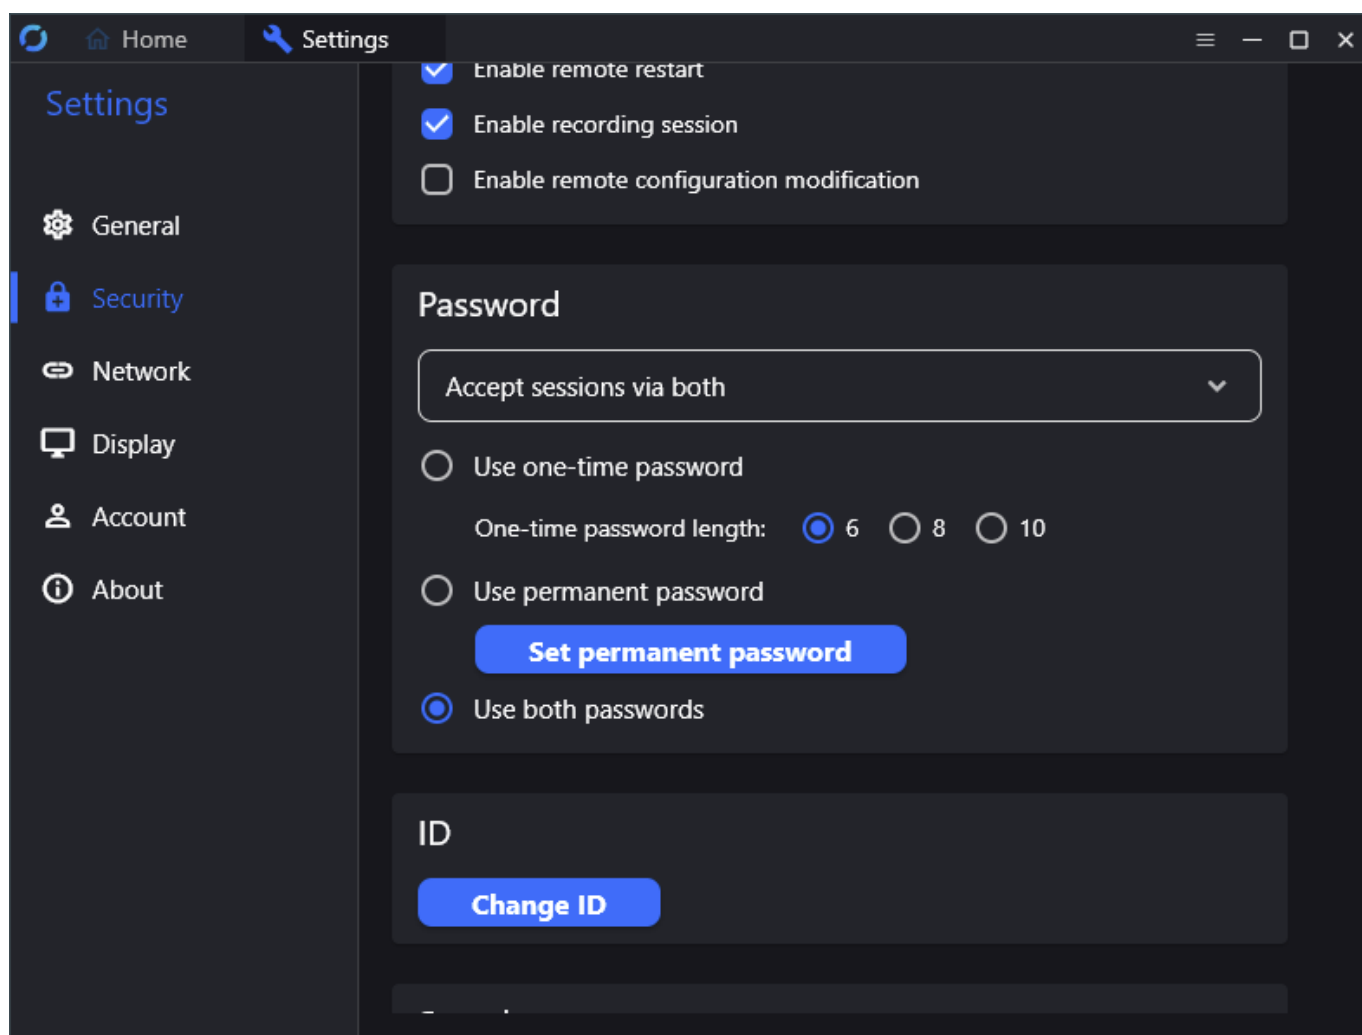

2. Set permanent password

3. Enter password

Make sure that “Use both passwords” option is checked.

Now you can access your computer from another client connected to the same Rustdesk server.
